THE GREATEST DISCOVERY
OF THE AGE!
DR. CHURCHILL'S
CELEBRATED COUGH SYRUP!

Prepared from Hoarhound and Tolu, by a Physician of Boston, Mass., and is the most pleasant and effectual remedy for Coughs, Colds, Hoarseness, Asthma, Bronchitis, Whooping Cough, Croup, Influenza, Pain in the Side and Breast, Spitting of Blood, Liver Complaint, Consumption, and all diseases of the Throat, Lungs and Chest, that has ever been discovered. It is perfectly harmless, and may be taken by the most delicate female or infant with perfect safety. It is the most pleasant to the taste of any medicine ever offered to the public, and will be found to be the most speedy in its effects of any remedy ever discovered. Two doses will relieve any ordinary cough, and one bottle will cure the most severe cough that has been of months standing. Let those who have been long afflicted with coughs, colds, &c., try this remedy, and be convinced of its virtues. Let those who have used it recommend it to their friends. Let those who have used it recommend it to their friends. Let those who have used it recommend it to their friends

THURSDAY, MAY 4, 1854.

TRIAL OF CORNING ANTIAS.

The report of the proceedings in the Assembly was concluded on Thursday morning. The examination was finished, and the counsel for the prosecution had the closing speech. Judge Parker will probably be left, on the 15th of June, to charge the jury. The principal witnesses for the prosecution were Mr. Stevens & Dewey of Albany, the owners of which, we are informed, a person can drop and never rise from next to none, for $50 instead of only one step, as the case of a sale and by half an hour, as an average. This does away every objection. Sleeping and waking by day is one of ease, as it is dark nearly 12 hours out of the 24—the rest is twilight. Improvements in the ship since with the in and the ground at the same operation, and the ground at the same operation, and the ground at the same operation,

FRIDAY, MAY 9, 1856.

HAMILTON AND LINCOLN.

A deep sojourn at these two station points north of us on the Chicago and Mississippi railroad, enables us to give a few items in relation to their present condition and appearance. The Hamilton point is scarcely more than title of Hennington, and situated in one of the most beautiful and productive regions of the state. We had occasion to pass this same place last July. There was then one dwelling built and a small store opening by Mr Gill. We counted rather dug-fly-ative unfinished buildings. There are fifty new goods wagon loads now piquanted on the corners. Seven stores other buildings are building, both nothing for business here this year.

We learned from Mr Armentrout, the enterprising superintendent of the station, that the sales and orders of wheat have been shipped from there the past winter, and that some made by Dodge Hill alone came up to 40,000 bu. He thinks there is not much wheat now on hand, but that it will depend from there during the summer. Hills, Brown, Dodge & Co. have shipped and handled largely since. Messrs Hills & Hoover have a large stock of dry goods and are selling off low. Mr Armentrout does largely in lumber. They will have a large stock of lumber during the present season. Since we looked up the station we learn they have ordered to build an elevator, forty by fifty feet, and sixteen high, to be completed and furnished up in a rich, beautiful farming region, already well settled. Trade must have also Osborn, Mr Hoge, Armitage and Wentworth.

Take all last year on the sale of lots, Hamilton did well. The most handsome and eligible business lots are selling for $100. Choice residence lots command the finger one valued at $300 each. Over one of the new school all stands the Methodist Episcopal church, a fine building. We don't wish to write any quality or make any false over a place. Hamilton as flourishing we think, however, they are going about the right principles, and we shall be disappointed if they don't get up a lot lots of twenty-five houses people before the years are over. We forgot to say that Hamilton has there are about sixty voters in town and not less than 300 inhabitants. Mr Armentrout, of Hamilton, formerly from Ohio, and Mr Hoge, from Illinois, have both been elected by the Democratic party to the board of county commissioners.

Lincoln is a large village in appearance, and we should say about 1,500 inhabitants. Here is another, where a man from Chicago is keeping and running twenty grocers. He values them at the round of a hundred dollars. Some more may be sold by such a cheap public auction, a few days ago a few sold over at $100 each. Lincoln is now in the midst of the most active farming section of the county.

In conclusion, we must tell our readers we filled our trip and enjoyed it. We found the people to be the very gentlemanly gentlemen who are ever to be met with in this life. We saw Mr Gill and Hollett. When we visit again we hope to be our business.

PETERSBURG RAIL ROAD.

Messrs. Editors:

We notice in every paper published in our vicinity, something said relative to the passage way and future destiny of Sangamon. Now, what is it that has been done to the cause of the one or the progress and prosperity city? Your population increases, your business is doubled and trebled in the past years. You are at this time witnessing a great increase in your property, and in the course of a period of your existence. A second to none your public citizens have ever been blessed with, for worth a small fortune to do more. The other has been the case with Petersburg, and hardly doubly employed. Now the question are you doing? In fact, there is a great deal about everything, and almost everything to supply the demand.

Every man who leaves the interior and your place will assure—this city can be a wonderful about by every one passing through it—"a second Athens," the very spot to make a second and the largest business by the great thoroughfare and reliance from nearest of the world's goods and wants to spare. Think that it is not so, and do it set up at the crossing of the roads and mainly travel, and make provision and what you can do to meet the wants of the people. Now is the time to act. Now is the time to do it. Now is the time to make it. Now is the time to be up and doing. Now is the time to be a live man. Now is the time to be a live man. Now is the time to be a live man

AMERICAN COLONIZATION SOCIETY.

The Ohio State Journal urges the claims of this Society to the public consideration and favor in a very able article. Less than fifty years ago, any contribution money came to the cause of colonization in a private circular to individuals only. The plan of forming a colony of colored Emancipados on the coast of Africa, was projected and the work begun, and a resolution was framed, with the desire to carry out the purpose by the voluntary contributions of the friends of the measure. The enterprise also in our favor the condition of the colored man constantly, under conditions and the acts of past years, improving the undoubtable rights of humanity in the other, and elevating the benign influence of Christianity and of public sentiment both. An unexpected success has also crowned the efforts of the friends of the Society, and the fact claims our favor now.

The enterprise would be more than human, were it not subject to some objections and to at least some points to avoid, and nevertheless the Colonization Society has commended itself to our favor. It believes now that none of the constitutional objections are in the way, and that the Society can be a free agent. And it considers that they need no Constitutional objections in the way now of raising, because the rise of the Republican party is supposed to be such as to throw down their main of the less colored people forever. We can say to feel confirmed in the fact that the very name rests of the Republican party, and produced does have a which it is many additions that contribute many additions to the in support their aid to our enterprise latter, as in January, in the organization of the party, the fact formation to the belief that the same interest would now be here which existed in other quarters, with a full determined hostility to the colored race of the South. Such fears were unwilling to help here and this subject is gone, because with the abolitionists of the South there is no longer political power.

We are pleased that the Society has turned the current of friendship of such advocates, and the determination of such opponents, and that it is going forward as a career of prosperity, fulfilling its mission for the benefit of mankind. It is unnecessary that we should enter with the re-assurances of its present and what eternity should be expected to be its future success. We have much. The proceedings of last meeting are very full, and we have before us the Annual Report, which is a document of much interest, and which presents the best possible view of the subject. We should be glad to find room for it.

ARRIVAL AT THE PACIFIC

New York, May 1.

The Pacific arrived this morning with dates to the 19th. The Africa arrived out on the 19th.

The Pacific brings $1,000,000 in specie, except that for Panama on whose account she left the Bay.
